JSR Performance Product

Manual for the BLOWSOME DLP

www.blowsome.kr www.teamxhaust.com www.jsrperformance.com

ENGLISH Version 1.0.1 2022/11

Foreword

Thank you for using BLOWSOME. BLOWSOME is an advanced active sound that provides users with the best experience based on easy product control through APP, which is developed based on non-sense of difference sound quality and user convenience. BLOWSOME is recommended that the person wearing it read the manual carefully so that the product can be fitted in the correct way. The manual provided includes a variety of tips and useful information, including basic installation methods, initial product testing, component information, and troubleshooting in the event of a problem. The BLOWSOME product must be fitted by a professional fitter who is skilled in installing automotive parts. To ensure proper installation and safe use of the product, follow the instructions provided in this manual. Unlike the instructions and warnings contained in the manual, the head office is not responsible for any damage or personal injury caused by improper installation, use and maintenance of the product (including direct/indirect or consequential damage). There may be editing errors or omissions in this manual, and the contents of the manual may be changed without notice to improve the performance of the product.

Copyright

This manual is protected by copyright law, and all rights are protected by law. Unauthorized reproduction, copying, modification or translation of this manual is prohibited except as permitted by copyright law. BLOWSOME is a registered trademark of JSR perfomance. The rights to all works related to the product, such as product design, trademark, and product promotion of BLOWSOME, belong to JSR performance. Unauthorized reproduction and use of related works without permission is prohibited. If you violate this, you may be punished in accordance with the relevant laws and regulations.

Safety and Compliance warning

Before installing the BLOWSOME product, you must verify and proceed with all of the items listed below.

- This manual applies only to the vehicles shown on the cover, and some parts, such as the brackets used in the manual, are designed for that vehicle. The installation method of the product may vary from vehicle to vehicle, and please check if the vehicle type in this manual matches the product you received.
- Please be careful about the temperature of the vehicle when installing the product. If you proceed with the installation immediately after the vehicle is finished, some parts of the vehicle may be very hot. Please install the vehicle after it has cooled sufficiently before starting installation.
- To prevent damage to yourself, others, or your car, make sure your vehicle is located safely. When installing in a small space, be careful about what you are installing.
- Once you have received the product you ordered, make sure that the components of the set you (or the fitter) have arrived properly. The components for each set can be found on the 'Product Configuration' page of the manual or on our website at www.teamxhaust.com. If a component is missing, contact your supplier (Headquarters or Distributor) before proceeding with the installation.
- Before installing it in the vehicle, make sure to conduct a test to check the operation of the product. If the product does not function properly during the test, refer to the FAQ included in the manual or contact your supplier (Headquarters or Distributor).

General note

Photo and Picture Information:

Photos and other illustrations used in the manual are intended to provide a general overview and individual steps for proper installation and use, and may not fully match the actual configuration of BLOWSOME.

Regarding the vehicle's basic condition:

The installation process may vary depending on other parts currently installed on the vehicle. When removing additional parts, follow the manufacturer's manual and proceed with BLOWSOME installation.

Regarding the installation process:

If the operator makes a decision different from the manual for any reason at the time of installation of the product, all information provided in this manual shall be considered general information provided for the convenience of the operator. Due to BLOWSOME, all responsibility for the removal of other parts, the vehicle manufacturer's warranty application, or the suitability for the use of the warranty lies with the fitter.

Supply

The following supplies are essential when using the download program. It is recommended that you prepare in advance.

Module

It is the BLOWSOME module. If fitted to the vehicle, it must be removed and prepared. * Contact the fitting company for the location of the module.

It is a USB A to USB mini-B type cable. It is enclosed when you purchase the product.

Windows 7 or later Internet-connected computers & laptops

It needs a Windows 7 or higher operating system and a computer with Internet support. It is also possible in a WIFI environment. You can use both laptop and desktop.

There is a DLP download program, a USB driver program in the compressed file. You can download it from the homepage. *** Please refer to 8p.

It needs a smartphone or tablet with BLOWSOME App installed.

BLOWJOME

Connecting a Module to a PC

If the following conditions are met, the type or performance of the PC is irrelevant.

- 1. Windows 7 and later operating systems
- 2. USB A type support
- 3. Internet accessible

When the module and PC are connected via USB, the module displays a green LED. The green LED is located on the USB connector part. The green LED indicates that the power is connected. If the green LED does not light, you must use a different USB port or a different computer.

Set DLP's ID and password

- 1. In order to use the DLP program, you need to set the DLP ID and password.
- 2. The ID and password are randomly given and can be changed at any time.
- 3. Enter the upper left menu bar -> Security Settings path.
- 4. Please change the ID form 3 12 characters / password form 4 12 characters.

After changing the DLP ID and password you want, click Change DLP Login Information.

Installing the USB Driver

Installing the USB Driver

Driver installation method for using MINIB USB connector. *Driver installation only needs to be done once when connecting for the first time.

1. Run the 'USB_Driver' folder

2. Execute installation file that meets user WINDOW specification(64bit or 32bit)

3. Click the Next(N) button

4. Check 'Agreed' (A)' and click 'Next (N)

5. Check driver status and click 'Finish'

6. Reboot the computer after installation.

Running DLP

If the USB driver is successfully installed, run the download program DLP.

Enter the ID and password set in the app and click OK button.

DLP programs have two main functions 1. Download sound and update firmware 2. CAN data transmission

This manual will only cover sound downloads and firmware updates, please refer to the dealer-only manual for CAN data transfer functions.

1. Sound Update

It's easy to think of it as moving sounds from the left (Server) to the right (Module).
